About the International Derivatives Clearing Group:

The International Derivatives Clearing Group (IDCG) is an independently operated, majority owned subsidiary of The NASDAQ OMX Group, Inc. (Nasdaq: NDAQ). IDCG brings a centrally cleared solution to the largest segment of the OTC derivatives marketplace, specifically interest rate derivative products. It does this through the operation of International Derivatives Clearinghouse (IDCH), a CFTC regulated derivatives clearing organization that currently acts as a central counterparty to interest rate swap futures contracts and expects to do so for other similar interest rate and currency derivatives in the future. IDCH, in conjunction with Razor Risk

Technologies, utilizes NASDAQ OMX Click XT matching and NASDAQ OMX SECUR clearing technology to provide an efficient and transparent forum to clear and settle derivative products. For more information about IDCG and IDCH, visit www.idcg.com.
